

Ophthal OPD at Lallubhai Compound.

An Ophthal OPD has been started at MRVC Health Center, Lallubhai Compound. CMD/MRVC was inaugurated the OPD on 4th August, 2014 in presence of Director/Finance, Director/Project and CPO. The clinic is unique in the sense of type of services available and the location of centre. In this clinic majority of eye conditions can be diagnosed and treated except the surgeries. There is no dedicated eye clinic, Govt or private in the adjacent area i.e. Mankhurd and Govandi.

Instruments and services:

- I. **Slit lamp**- Diagnosis of anterior chamber (Part in front of lens) conditions
- II. **AutoRef-Keratometer**- To diagnosis refractive errors and prescription of spectacles and contact lenses
- III. **A Scan**- Ultra-sonography of eye, necessary before surgery to know the prognosis
- IV. **Retinoscope**- Diagnosis of retinal conditions such as retinal tear, diabetic or hypertensive retinopathy
- V. **Digitalized i chart**- Used for correction of refractive error, 21 languages regional available
- VI. **Snellen's chart**- for diagnosis of near vision problems and colour blindness
- VII. **Surgical instruments**- Removal of foreign bodies from eye
